

Battledown Centre for Children and Families

PE Grant Data and Impact Analysis

What is the Sports Premium?

The government is providing funding of £150 million per annum for academic years 2013-2020. This money is coming directly to Head teachers to spend on improving the quality and provision of sport and PE for the primary aged pupils in their schools. This money can only be spent on sport and PE provision.

How does this effect and impact Battledown Centre for Children & Families?

All pupils where practicable will access a breadth of physical activity.

- Develop a greater breadth of resources so that PE activities can be delivered more effectively.
- Ensuring ALL pupils, regardless of their physical needs, are able to access, make progress and enjoy the PE curriculum.
- Providing a clear and structured PE curriculum across the whole school.
- Develop a consistent method of PE assessment across the whole school.
- Through staff training, we will improve the quality and consistency of provision and help improve staff confidence in delivering PE.
- Provide specialist provision and opportunities in PE through specialist coaching (I.e. Riding for the Disabled).
